PROFILE

IT support and networking professional with 20 months of hands-on experience supporting a live multi-building campus network, now working in fibre customer support. Experienced in Windows and user-account troubleshooting, switch and access point configuration, structured cabling, LAN/Wi-Fi fault finding and incident documentation. Completed CCNA: Introduction to Networks and working towards the full CCNA certification. Available for an immediate start; willing to relocate.

EXPERIENCE

Fibre Customer Support & Shop Assistant — Current role

- Handle customer service queries and first-line fibre connectivity troubleshooting.
- Check ONT power and alarm indicators and router connectivity to work out where a fault sits.
- Escalate faults to technical teams with clear notes and keep customers updated.

IT Technician (Work-Based Experience) — Ekurhuleni East TVET College, Gauteng · Jan 2024 – Aug 2025

- Tier 1–2 IT support for staff and students, on-site and remotely (AnyDesk, Remote Desktop).
- Windows installation, hardware, printer and user-account troubleshooting, including Active Directory user accounts.
- Installed, configured and maintained switches, wireless access points and end-user devices across multiple campus buildings.
- Deployed and configured switches across three classrooms serving more than 60 workstations, including structured cabling and patch-panel termination.
- LAN and Wi-Fi troubleshooting: signal validation, IP-conflict resolution and bandwidth testing.
- Maintained asset registers, service records and job completion reports; escalated complex faults with documented incident notes.

TECHNICAL SKILLS

Hands-on: Windows troubleshooting and OS installation · Active Directory user accounts · hardware and printers · AnyDesk and Remote Desktop · switch and access point configuration · structured cabling · LAN/Wi-Fi troubleshooting · incident logging and escalation · ticketing (ServiceNow, Zendesk, Freshservice) · fibre and field work (splicing, OTDR, CPE, RF testing)

Lab / coursework: TCP/IP, IPv4, DNS and DHCP · VLANs, trunking, routing and switching incl. OSPF · ACLs and basic network security · Cisco Packet Tracer · Wireshark · Nmap · Microsoft 365 fundamentals · network monitoring concepts

PROJECTS

- **Campus Network Infrastructure Upgrade** (real deployment): switches, structured cabling and patch panels supporting 60+ workstations across three classrooms.
- **Secure Academic Network** (Cisco Packet Tracer simulation): secure LAN/Wi-Fi design with firewall policies and ACLs.

EDUCATION, CERTIFICATIONS AND TRAINING

- **NCV Information Technology and Computer Science (NQF Level 4)** — Ekurhuleni East TVET College, 2024
- **Ethical Hacking** — certificate of completion, 2026 (Wireshark, Nmap, vulnerability assessment)
- **CCNA: Introduction to Networks** — Cisco Networking Academy, 2024 (course completion)
- **IT Essentials: Hardware & Software** — Cisco Networking Academy, 2023 (course completion)
- **National Senior Certificate** — TANDI High School, 2020
- **CCNA (full certification)** — in progress, not yet earned

AVAILABILITY

Immediate start · permanent, contract or temporary · on-site or remote · overtime, weekend shifts and emergency call-outs · medically fit for work at heights and in confined spaces.
